

I have really enjoyed taking this class, I feel as though I have learned a lot about the way our country works. I really appreciated that instead of just stuffing our heads with facts, we were encouraged to think critically and form our own opinions about different topics. The small class size was really helpful because it made it easy to voice my thoughts and to hear other opinions. I feel that Mr. De Gree really believes in what he is teaching and he really cares about giving us the tools to be effective members of our society. I believe that after taking this class, I am much more knowledgeable and equipped to be an active participant in our government.

High School American History taught by Mr. John De Gree is the perfect history course for Christian teenagers. Each class presents an opportunity to interact with fellow students and our teacher Mr. De Gree who, with his extensive knowledge of American history engages students in animated conversations that are both informative and enjoyable. It is at a convenient time, as well, and should work out for most teens, even those with tight schedules. I strongly recommend this class for any Christian High-schooled student.

We love your classes John. I love that you pull current events into the Socratic discussion class and into the course.
